expert organic skincare

Care for oneself and for the other, with respect for people and the planet, with kindness, transparency and expertise.

We believe respect, goodwill, human values are the essential values contributing to the well-being for all.

We believe that beauty goes far beyond appearance : self-esteem and self-confidence are key. This begins with simple gestures, with skincare and with the moments for pampering yourself every day.

Take care of oneself and care for the environment go together : ORGANIC beauty has become a necessity. To respect and develop humanistic values is a real challenge.

Feel good, feel free, act in conscience with and for oneself, act in respect of others and the environment, this is what estime&sens offers you, a certified organic beauty brand, dedicated through its skincare products and treatments, together with beauty and well-being professionals, to creating self-esteem and meaning every day.

A BRAND CREATED BY AN ESTHETICIAN FOR THE ESTHETICIANS

Between you and us there will always be estheticians. They are our most precious partners and guarantee the transmission of expertise of our treatments and skincare products.

There are not bad products, but only wrongly chosen products. Strong advocates of a tailor-made approach, we fight against overconsumption of cosmetic products bought on impulse after discovering them in the press or on internet. They replace your previous product most often still half used. Stop !

Our goal is to please you and here is the secret sauce of our success :

Listening : each partner esthetician working with the brand gives attention and understands your expectations in terms of results, beauty regimen or texture preferences...

Skin diagnosis and advice : after listening, a precise and objective skin diagnosis will help you choose the products for the expected results.

Synergy : estime&sens magic is that all products act in synergy and can be combined with each other to precisely meet the physiological needs of your skin according to the season. Therefore we propose products at reasonable price to allow you to follow a complete beauty routine.

Our plus : the richness of our oils allows to provide all necessary micro-nutrients to the skin for a rich and balance diet, without any deficiency or addiction. Once your routine is defined, while your needs remain unchanged, you can continue with it as long as it pleases you. If new expectations or needs occur, then ideally add a new product into your regimen and continue your routine in order not to destabilise your skin.

ORGANIC PASSION

no greenwashing...

All estime&sens products are ECOCERT certified with the COSMEBIO label.

Created in France, COSMEBIO is the worldwide top organisation specialised in organic and natural beauty.

In order to be fully organic certified, a cosmetic product should meet several requirements :

- 95% minimum of ingredients from natural origin in the product.
- 95% minimum of organic ingredients in the total of the plant ingredients.
- 10% minimum of organic ingredients in the total of the product (ecocert standard), 20% (ecocert cosmos organic standard)

A COMMITTED BRAND

truly committed...

Take care of others is at the heart of our mission. For this reason we give back part of our profit to socio-esthetic development in hospitals, especially for patients touched by cancer. We know how important, and after all also therapeutic, is a skincare treatment for people with disease.

This meaningful commitment gives purpose to our every day action to take care of you at best.

ESTIME&SENS SOCIO-ESTHETIC CONTRIBUTION

SOCIO-ESTHETIC

Self-esteem is meaningful for recovery !

Contribute to physical and psychological well-being of ill persons, help them restore their self-esteem, and be themselves involved in their recovery process is fully part of the estime&sens mission.

TRANSPARENCY & EFFICACY

formulations

Many of our active ingredients are originating from France, others are coming from further away. For example our argan oil comes from Morocco. We make no concession on their quality, the way they are produced, and of course on their organic certification.

We work closely with our regulatory expert to guarantee the best formulation with special

attention to safety and quality. Efficacy is measured and proven : our ingredients are tested and proven active in order to provide maximum results.

To know more about our active ingredients, visit our botanical collection: www.estimate-et-sens.fr

Our environment friendly packaging

Committed to eco-responsibility, we are aware of the impact of our choices and seek to improve ourselves a little more every day.

Our local suppliers (filling, packaging) are based nearby, in the Nantes region, in the west part of France, and in Italy.

Our packaging has evolved since the beginning. It is fully coherent with our eco-responsible approach.

Our graphic design is minimalist to save on inks.

We have added an information cartridge to help sort our packaging.

We use recycled paper and plastic whenever possible.

We sell only what is necessary and propose refill pods for jars.

We use light weight glass as thin as possible without being fragile.

We can do even better and are committed to achieve more.

These choices allow us to propose high quality products with full respect of health and nature at the most reasonable price.

We redesigned our packaging and have chosen refillable jars. Less waste and no useless over production. We limit our carbon footprint with material lighter for transport. All our 50ml cream jars are thus refillable while offering you the same comfort of use every day.

face skincare

Our range of face skincare products has been designed for the demanding woman who trusts organic cosmetics to take care of herself every day..

Organic beauty according to estime&sens means also refinement, efficacy and pleasure in use.

Should it be for a cream, a mask, a scrub, or an anti-aging treatment, we make no concession on the product galenic, its sensorial qualities and its pleasure in use. Today, to take care of myself why should I have to choose between organic beauty and pleasure in use ? We should dare to say that we want both beauty and organic !

For each skin type there is a personalised answer : the power of botanical oils allows to protect the most sensitive skins, to nourish and recomfort dry skins, to sublimate tanning, to regulate the hydro-lipidic film of combination to oily skins. Organic essential oils target their action on imperfections, pigmentation spots, or redness. Algae, plants, seed extracts, bark... nature offers infinite numbers of combinations that our laboratories carefully combine to provide the desired efficacy for each of our products.

We wish you a pleasant discovery of our face and body skincare ranges. However, as nothing can replace a real consultation with listening, diagnosis and personalised advice from a professional, we recommend you to visit the nearest estime&sens beauty salon!

WATER, A FUNDAMENTAL ELEMENT

Without water there is no life, we all know that, but what about our skin ?

Water is a precious element contributing to proper skin cell metabolism, it is an essential asset in great quantity to beautify our skin. Indeed a skin filled with water is more radiant and smoother. Water is an amazing anti-wrinkle weapon.

But skin is waterproof. Even worse : if you leave water to dry on skin, it will become even more dehydrated. Moreover it is important to know that your skincare products penetrate less, and less deep on dehydrated skin. Therefore, before any other action, you need to moisturise your skin. This is why in all estime&sens professional treatments we apply two masks : first a moisturising mask, then a second one to provide all the required active ingredients for the expected results.

3 GOOD REASON TO RECEIVE A PROFESSIONAL TREATMENT

- 1 Time for yourself : when you feel good with yourself you feel good with others.
- 2 Because each estime&sens treatment, with its specific manual techniques, will optimise the results of our organic skincare products and you will experience great relaxation.
- 3 **Relax, your esthetician takes care of everything**

Because your satisfaction is key, specific professional products used will trigger your skin transformation process to maintain with the home products recommended by your esthetician.

Asks for your personalised estime&sens beauty routine to your esthetician.

Don't be afraid by the list of recommended products, it is an important information. Each product will contribute to the expected results and it is easy to identify the products you need first and then add others with your next consultation.

HOW OFTEN SHOULD YOU RECEIVE A PROFESSIONAL TREATMENT ?

Ideally, one treatment per month as it corresponds to the cell renewal cycle. If you are unable to book one hour for yourself per month, then one treatment per season will work, but not less. Here are the corresponding benefits :

Spring treatment : to wake up your skin after the winter : our skin functions are slowed during cold time, spring is the ideal time to reboost the skin specifically with professional exfoliation.

Summer treatment : to prepare your skin to the sun, and especially erase all the accumulated fatigue. A treatment to prepare your skin to enjoy the benefits of the summer break and for a beautiful return.

Fall treatment : because our organism feel the change of season, our energy decreases, and the complexion becomes more dull. It is time to stimulate and boost the skin to reduce the signs of time.

Winter treatment : to nourish, moisturise, recomfort, soothe like a cocoon, but also to stimulate the skin.

“

For 30 years, I have been telling my clients they should take more care of themselves. Take a moment for oneself is a must so that our mental load is bearable.

”

“

**Sovereign. Indispensable.
So relaxing.
I should receive it more often...**

”

These are the testimonials from clients after receiving an estime&sens body treatment from our partner estheticians.

What are you looking for when you book a body treatment ?
A relaxing moment, let go, we know that. As organic skincare experts, we offer you more.

All our body treatments begin with a simple question : what result do you expect from this treatment on your body (hydration, regeneration, draining, nourishment...) ?

Performed with our cult
Essences of esteem (*to discover page 22*), each
body treatment is inspired
by massage techniques from
different part of the world.
Ready, relax...

After vacations in Andalusia with my wife Nathalie, we kept the memory of our breakfasts under fig trees with their enchanting scent. In order to keep with us the memory of these vacations, we created the Sovereign balm, now a cult product in its aluminium jar and also proposed in a nomad limited edition. Hands, elbows, knees, feet, no dry zone can resist to this magic balm.

botanical oils

the secret

An ORGANIC cosmetic product contains 20 to 100% of botanical oils grown in organic farming*. Oils are rare, precious and unique because they are **100% active**

estime&sens expertise : rich in essential fatty acids and vitamins, estime&sens oils are chosen according to the physiological needs of the skin. Indeed, a cream suitable for dry skins will not contain the same oils as a cream for combination skins. **Nothing is left to chance** so that you are 100% pleased with the result.

Oils also facilitate the penetration of active ingredients and open your skin's appetite. Therefore, you should include them in your face and body beauty routine for improved efficacy and maximum pleasure.

Expert advice : we should all have an estime&sens botanical oil in our cosmetic bag to use according to skin needs daily or several times per week. **So, listen to your skin** and choose the appropriate Simplessence (for the face) and Essence of esteem (for the body).

Discover in the following pages the botanical oils contained in most of our products.

***Pure** : no pesticides, fungicides, chemical fertilizers, or GMOs.
Do yourself only good, not any harm

essences of esteem

Massage and self-massage improve self-esteem with a better feeling of one's body. With its cosmetic « common sense » and in coherence with its DNA, estime&sens created the essences of esteem and filed the trademark. The essences of esteem made of 100% botanical oils and delicately scented can be used directly on the skin or mixed with other products to boost their penetration and efficacy. Having an essence of esteem in your cosmetic bag is a must. 6 specific essences of esteem available, which one is for you ?

01. «Harmonie» The lighter of all, it rebalances body and mind thanks to its delicate Yunnan verbena scent. Suitable for all skins, particularly thin epidermis, the perfect partner of the hydro-tonic body milk to bring firmness to the bust and all areas lacking firmness - 100 ml

02. « Absolue douceur » The richest and most universal one, to be applied on face, body and hair, it will please the driest skins. With its praline, almond & raspberry scent, it is the estime&sens top selling product- 100 ml

03. «Luminescence» Want a glowing complexion, or to wear your favourite skirt but your legs are too white, or to enhance your tan with glow and a light iridescent effect? This oil will provide the missing natural and undetectable colour touch - 100 ml **04. « Soirée d'été »** For face and body, this is the gifted after sun oil. Soothing, moisturising, nourishing, it helps boost and prolong tan. Its enchanting tiare flower scent reminds of the warm sand in evening summer. The carrot extract oil will sublimate your skin - 100 ml **05. Slimming booster** See page 26 **06. « Infinie plénitude »** Dedicated to women who want to feel good but lacking time to receive a pampering treatment, or in between two well-being massage sessions, it is the most skin regenerating essence of esteem - 100 ml

The essence of esteem « Infinie Plénitude » is inspired by the HYGGE trend. Originating from Denmark & Sweden, it is the art of creating the best condition for well-being experience. At estime&sens we have thought about all the tired women, with heavy mental load who visit beauty salons. Designed around 3 seed oils : linen, hemp and cotton, that remind of the eponym fabrics, we have created « Infinie plénitude » like a stole to wrap around yourself for a good, protective and warm feeling.

INSIDE AT THE SERVICE OF OUTSIDE

Taking care of one's skin with cosmetic products is good but is it sufficient? When you buy a slimming cosmetic product, you combine it with a balanced diet to obtain results. Why not have the same approach for face beauty? Taking care of oneself from within will optimise the visible results outside.

The estime&sens answer : the beauty drinks. Developed by a family of organic herborists since 1967, we have chosen herbal teas rather than nutritional supplements. Why? For the pleasure... pleasure of a break, of enjoying a hot drink, tasty pleasure... but also because the dry plants in our herbal teas are not reduced to powder, they are cut in small pieces to preserve a maximum of active ingredients
